

KF ARMORED VEHICLES

■ The Beast

The **Beast STANG II and III** armored personnel carrier (APC) is a highly capable combat vehicle designed to enhance force protection and operational effectiveness in high-threat environments.

Engineered for battlefield superiority, it delivers advanced firepower for precise target engagement while supporting diverse tactical missions. Built for enhanced maneuverability across rugged and unforgiving terrain, the APC ensures combat readiness in dynamic scenarios.

Equipped with integrated day-and-night surveillance, target acquisition systems, and electronic warfare capabilities, The Beast excels in special operations, rapid deployment, reconnaissance, force protection, and peacekeeping missions. It offers varying levels of ballistic and blast protection against enemy fire, including small arms and projectile fragments, while accommodating up to 10 personnel for mission execution.

■ Phantom

The **Phantom** armored vehicle to deliver unparalleled protection for military convoys and personnel in hostile conditions. The Phantom combines effective fire-power with the versatility needed for specialized engagement operations and multi-mission functionality. Known for its high tactical and combat efficiency, it excels in harsh and unforgiving terrains.

With advanced capabilities such as day-and-night surveillance, detection, and jamming systems, the Phantom is built to address the demands of modern military operations, including special operations, quick response, reconnaissance, protection, and peacekeeping duties.

■ Scorpion

The **Scorpion** armored vehicle to ensure maximum protection for military convoys and troops operating in hostile environments. The Scorpion delivers exceptional firepower, supporting specialized engagement operations and excelling in a variety of mission profiles.

The **Scorpion** is renowned for its superior tactical and combat capabilities, even in rugged and challenging terrains. Equipped with advanced day-and-night surveillance-detection-and jamming technologies, the Scorpion is designed to meet the diverse requirements of military operations, including special operations, rapid response, reconnaissance, protection, and peacekeeping missions.

Hurricane

The Hurricane F-550 4x4 Armored Personnel Carrier is designed for versatile deployment, including various missions, peacekeeping operations, and convoy escort. Its impressive power and handling make the F-550 equally suited for urban and off-road environments. The vehicle offers excellent protection against both ballistic and blast threats, with crew compartment protection at CEN Level BR6 armor.

The Hurricane can be configured for a wide range of applications, from a battlefield ambulance to a fully armed direct fire vehicle. We offer a wide range of additional features that can be integrated during the manufacturing phase to ensure total compatibility, including rocket launch systems, remote-controlled weapon stations, smoke grenade launchers, night-vision highspped cameras, and fully integrated intercom systems.

■ Python

The **Python** is an armored vehicle engineered to provide unmatched protection for military convoys and personnel operating in hostile environments. Combining superior firepower with exceptional versatility, Python supports specialized missions and multi-role operations with ease. Renowned for its tactical excellence and combat efficiency, Python thrives even in the harshest and most challenging terrains.

The **Python** is Equipped with advanced day-and-night surveillance, detection, and electronic jamming systems, Python meets the rigorous demands of contemporary military tasks, including special operations, rapid response, reconnaissance, force protection, and peacekeeping missions.

■ Chevrolet Silverado

Get ready to conquer any terrain with the Toyota Hilux, a legendary pickup truck that combines ruggedness, versatility, and unmatched durability. Built to withstand the most demanding challenges, the Toyota Hilux is a valid symbol of off-road supremacy. It is the perfect choice for those seeking an armored vehicle that doesn't compromise performance.

Force

The **Force armored vehicle** combines advanced technology with contemporary design to deliver outstanding protection, superior mobility, and exceptional versatility, particularly in challenging and rugged terrain. Its remarkable maneuverability enables rapid deployment and response capabilities, ensuring mission success across diverse operational environments.

Designed to excel in internal security operations and armed forces engagements, The Force effectively meets a broad spectrum of mission requirements, from peacekeeping and reconnaissance to direct combat scenarios.

Force armored vehicle comes equipped with state-of-the-art communication systems and offers modular configurations adaptable to specific user requirements. It supports additional integrated systems, including fire suppression systems, jamming devices, laser warning receivers, and Situational Awareness Systems (SAS), without compromising its original performance characteristics.

300 SRM

A **lightweight, compact 4x4 armored vehicle** built on the OEM Toyota Hilux pickup platform, designed and developed to support prolonged convoy operations while meeting the operational requirements of military forces, special operations units, and law enforcement in urban environments and narrow streets. Additionally, the vehicle serves as an armored reconnaissance platform. To enhance its firepower against fortified positions, armored targets, and enemy vehicles, it is equipped with a remote-controlled firing platform for SRM-Nash rockets.

T6-450

A compact, lightweight, and highly mobile 4x4 armored tactical vehicle designed to meet military operational requirements while providing a reliable solution for protecting convoys of military forces, special operations units, and law enforcement in urban environments and confined spaces.

■ The Giant ■

8x8 ARMORED PERSONNEL CARRIER engineered to meet modern defense and security requirements at the entry level. Designed for versatility, it offers high-level protection, compliant with STANAG 4569 KE Level 3, with an optional upgrade to STANAG Level 4. The vehicle can function as an Armored Personnel Carrier (APC) or a combat vehicle, with the capability to integrate various armament configurations to suit mission requirements.

■ The Storm ■

6X6 ARMORED PERSONNEL CARRIER offers high mobility and superior protection, integrating cutting-edge armored vehicle technologies to enhance performance and durability. Designed to meet the operational requirements of modern armed forces, it ensures reliability and effectiveness in various mission environments.

VIP Vehicles

KF® **VIP Armored Vehicles** are precision-engineered to the highest standards, integrating innovative, lightweight ballistic armor for comprehensive, all-around protection. Utilizing advanced armoring technologies, these vehicles provide ballistic protection that meets or exceeds CEN 1063 BR6 standards while maintaining the vehicle's original design and functionality.

KF® has also developed a proprietary armored overlap system to protect door seals from bullet penetration. Additional security enhancements include integrated sirens and public address systems, LED strobe lights, a blackout package, an engine bay fire suppression system, and a door-assist mechanism for easier handling of armored doors.

KF® VIP Armored Vehicles are available for global delivery to major seaports, with airfreight options available upon special request.

■ Cadillac Escalade

■ GMC Yukon

Lexus

The **Lexus VIP Armored Vehicle** combines luxury with cutting-edge ballistic protection, offering discreet yet superior security for high-profile individuals. Engineered to meet or exceed CEN 1063 BR6 standards, it features a proprietary armored overlap system, reinforced door seals, and integrated security enhancements such as sirens, LED strobe lights, and a blackout package. Designed for comfort and safety, it provides seamless protection without compromising the vehicle's original design and performance.

Chevrolet Tahoe

The **Chevrolet 4x4 Armored Vehicle** is built for multi-mission deployment, including peacekeeping operations and convoy escort. Engineered for durability and high performance, it delivers exceptional power and handling, making it equally effective in urban environments and off-road terrains. Advanced armor technology ensures maximum protection while maintaining operational efficiency.

■ Nissan Patrol

The **Nissan Patrol 4x4 Armored Vehicle** is designed for high-level security and versatility, offering exceptional offload capability and urban maneuverability. Engineered with lightweight ballistic armor that meets or exceeds CEN 1063 BR6 standards, it provides all-around protection without compromising performance. Additional security features include a proprietary armored overlap system, reinforced door seals, integrated sirens, LED strobe lights, a blackout package, and an engine bay fire suppression system. Built for reliability and durability, the Nissan Patrol Armored Vehicle ensures safety in high-risk environments.

■ Toyota Land Cruiser (TLC) 300

The **Toyota Land Cruiser 300 VIP Armored Vehicle** seamlessly blends luxury with uncompromising security. Designed for high-profile individuals, government officials, and corporate executives, it features state-of-the-art ballistic armor compliant with CEN 1063 BR6 standards. The vehicle retains its original performance while integrating advanced protective measures such as a reinforced armored overlap system, bullet-resistant glass, upgraded suspension, sirens, LED strobe lights, a blackout package, and an engine bay fire suppression system. Whether navigating urban streets or rugged terrains, the TLC 300 Armored Vehicle delivers top-tier protection, comfort, and reliability.

■ Toyota Land Cruiser (TLC) 200 Series

The **Toyota Land Cruiser 200 Series Armored Vehicle** is designed for high-performance security and reliability, making it the ideal choice for government officials, corporate executives, and high-profile individuals operating in high-risk environments. Engineered with advanced ballistic protection that meets or exceeds CEN 1063 BR6 standards, it ensures all-around safety without compromising the vehicle's original performance. Key enhancements include a proprietary armored overlap system, reinforced door seals, bullet-resistant glass, upgraded suspension, sirens, LED strobe lights, a blackout package, and an engine bay fire suppression system. Whether for urban navigation or off-road operations, the TLC 200 Series provides unmatched durability, protection, and comfort.

■ Toyota Prado

The **Toyota Prado 4x4 Armored Vehicle** offers a perfect balance of security, mobility, and luxury, making it an excellent choice for VIP transport, security agencies, and special operations. Equipped with lightweight ballistic armor meeting CEN 1063 BR6 standards, it provides superior protection while maintaining agility and fuel efficiency. Security upgrades include an armored overlap system, reinforced door hinges, run-flat tires, an upgraded suspension system, integrated sirens, LED strobe lights, a blackout package, and an engine bay fire suppression system. Designed for both urban and off-road missions, the armored Prado ensures top-tier security without sacrificing comfort or performance.

■ Toyota 79

The **Toyota Land Cruiser 79 Series** Armored Vehicle is a rugged and highly durable security platform, designed for military, law enforcement, and convoy protection in hostile environments. Built to withstand extreme conditions, it features advanced ballistic protection meeting or exceeding CEN 1063 BR6 standards while preserving its renowned off-road capability. Key security enhancements include an armored overlap system, reinforced suspension, heavy-duty run-flat tires, bullet-resistant glass, an engine bay fire suppression system, LED strobe lights, and a blackout package. Whether operating in remote regions or urban areas, the TLC 79 Series ensures mission success with unmatched reliability and protection.

■ Mercedes-Benz Sprinter 3500

The Mercedes-Benz Sprinter 3500 Armored Vehicle combines spacious interior design with advanced ballistic protection, making it an ideal solution for **secure personnel transport, cash-transport operations, and VIP security**. Engineered to meet or exceed CEN 1063 BR6 standards, it features lightweight armor that ensures full perimeter protection while maintaining vehicle performance. Security enhancements include an armored overlap system, reinforced door hinges, run-flat tires, an upgraded suspension system, integrated sirens, LED strobe lights, a blackout package, and an engine bay fire suppression system. With its high payload capacity and exceptional mobility, the armored Sprinter 3500 is built for reliability and safety in high-risk environments.
